Abdelaziz ElHelaly Eleisawy

01091653415 | s-abdelaziz.eleisawy@zewailcity.edu.eg | Sadat City, Menoufia

Summary

Driven Data Science Student | Passionate about Solving Complex Problems through Analytics and Machine Learning, skilled in statistical analysis, and data visualization. Proficient in Python, adept at extracting valuable insights from intricate datasets to facilitate informed decision-making.

Education

University of science and Technology in Zewail City | 6 of October, Giza
Data Science and Artificial Intelligence | 06/2026

Skills

Python, C++,SQL,Data Visualization, Data Analysis Skills, Web Scraping, Machine Learning, Algorithm Design, Computer Networks, Data Retrieval

Certificates

[Python and Statistics for Financial Analysis](#) | [Exploratory Data Analysis for Machine Learning](#) | [Data Analysis with Python](#) | [Investment Risk Management](#)

Projects

- **Airline Management System**

Developed a user-friendly web application using C# programming language with ASP.NET framework, HTML5, CSS, and SQL Server as the backend database management system. The system enables users to conveniently book, cancel, and modify flight reservations with ease.

- **Zewail City Dashboard Insights**

A comprehensive dashboard for Zewail University to efficiently manage and visualize insights. The dashboard provides insights into the university's departments, instructors, students, majors, and courses offered.

- **Automated Teller Machine (ATM) Banking System**

It's a software solution that enables customers to perform various banking transactions without the need for human assistance. It provides a convenient and efficient way for customers to access their accounts, withdraw cash, deposit funds, transfer money, and perform other banking operations.
